EDUCATION

Bachlors Of Computer Science

Virtual University Of Pakistan

2021-2024 Cgpa:3.4

Bsc Computer Science (2years)

University Of The Punjab

2019 - 2021 Cgpa:3.7

SKILLS

- React.js
- Next.js
- Node.js
- JavaScript
- Zustand
- Tailwind CSS
- PostgreSQL
- SCAD CN UI
- LangChain
- TanStack Query
- Redis
- Material UI
- REST APIs
- Redux
- Microservices
- Express.js
- MongoDB
- TypeScript
- NestJs
- Git
- Docker
- AWS

Muhammad Suleman

Mern Stack Developer

Mern Stack Developer with More than 2 years of experience building impactful web solutions. Committed to delivering results through a blend of technical proficiency and creative problem-solving

EXPERIENCE

Full Stack Developer Backend (SiriusB)
Working)

08-2025 - (currently

- AI-focused backend engineer building scalable systems with NestJS, Node.js, and MERN stack.
- Handles high-traffic applications using queues (BullMQ / Redis / RabbitMQ) for async and background processing.
- Designs performance-optimized APIs with caching, rate limiting, and load-aware architectures.
- Delivers secure, production-grade systems with JWT, RBAC, and robust error handling.
- Builds modular, fault-tolerant backends ready for AI workloads and microservices.

Mern Stack Developer (Infini8ai)

08-2024 - 07-2025

- Built scalable Node.js microservices with advanced caching, rate limiting, and high-concurrency performance.
- Designed a production-ready RAG pipeline enabling accurate, context-driven AI responses.
- Implemented asynchronous workers & message queues for reliable service orchestration.

Mern Stack Developer (Skylarks It Solutions)

12- 2023 -07- 2024

- Leveraged React.js and Next.js to architect and deliver highly responsive, visually appealing UIs, guaranteeing cross-device parity and optimal rendering performance.
- Designed, deployed, and managed scalable RESTful APIs utilizing modern architectural patterns to ensure high-performance client-server communication and reliability.
- Instituted robust security protocols, including JWT-based authentication, utilizing advanced encryption and hashing techniques to fortify application access and data integrity..

PROJECTS

Gamora - Web Based GamingPlatform

- Developed and maintained scalable backend APIs for a high-traffic gaming platform. Improved performance and reliability using queues, caching, and async processing to handle traffic spikes.
- Designed robust backend architecture optimized for scalability and future expansion.
- Enhanced system stability through logging, monitoring, and query optimization.

ResearchPal - AI-Powered Research Tool

- Developed an AI-powered research assistant tool to provide context-aware knowledge retrieval and faster insights.
- Implemented a scalable web application using React.js, and Node.js for smooth frontend-backend integration. Implemented a robust admin feature for comprehensive oversight.
- Technologies Used : React js, Redux Toolkit, Material ui ,Node js, Express js , PostgreSQL

ManageKaro-(Financial Management Platform)

- Developed Managekaro, a scalable inventory management platform using React.js, Node.js, and microservices architecture, enabling efficient tracking and management of products, stock levels, and orders.
- Optimized frontend performance with memoization, lazy loading, and code splitting, ensuring a fast and smooth user experience for handling large inventory datasets.
- Implemented Redis caching and Pub/Sub mechanism to provide real-time stock updates and maintain data consistency across distributed services.
